

Material	Width	Height	Area	Thickness	Leafs	Volume	Density	Additonal weight	Weight

Steps:

1. Select **Material from Drop Down** List
2. Enter Door **width** and height in **Meter**
3. Enter Door **thickness in Meter** (for metal consider sheet thickenss for 2 sides, For DGU add two Glass thickness in Meter)
4. For **Alu. Framed Door** add thickness of Glasses under Thickness field and add additional weight for Alu. Frames under Additional weight field)
5. **Add Leafs** in numbers = for Single Leaf =1 & For Double Leaf =2
6. Other Fields are Auto filled.
